

Passenger Boarding & Balloon Safety Instructions

Passenger Briefing

- Passenger exclusion zone during inflation – stay behind the cones at all times and close to the vehicle until instructed otherwise
- DO NOT stand behind or walk between the vehicle and the basket.
- Smoking, dangerous goods and animals are not permitted.
- Pregnant women must advise the pilot
- No thongs or high-heels
- The inflation fan is dangerous – stay well clear, be aware of loose clothing and long hair. Loose items such as dangling jewellery and scarves MUST be left on the bus.
- Entry and exit to the basket – use the footholes.
- Landing position – feet together, knees slightly bent, your back pressed into padding (or sideways facing the pilot) towards the direction of travel and holding the rope handles.
- You will be instructed to get in to the landing position before take-off and on landing.
- Do not touch anything in the pilot's compartment or any hanging ropes/lines.
- Secure cameras and other loose items before landing. No camera straps around your neck.
- Layover landing – basket may lay on its side. Your pilot will advise if this will happen. Remain in the landing position.
- Do not leave the basket until instructed by the pilot as even weight distribution is important. If we have landed and there is a passenger changeover required (one in and one out at a time), please keep clear of the front of the basket.
- DO NOT jump from the basket at any time, you must use the footholes. Ask for crew assistance if required.
- Any questions, please ask.

Passenger Safety Briefing

Climbing into the Basket

entry: Use the footholes in the basket.
exit: In emergency, any side may be used.

After take-off

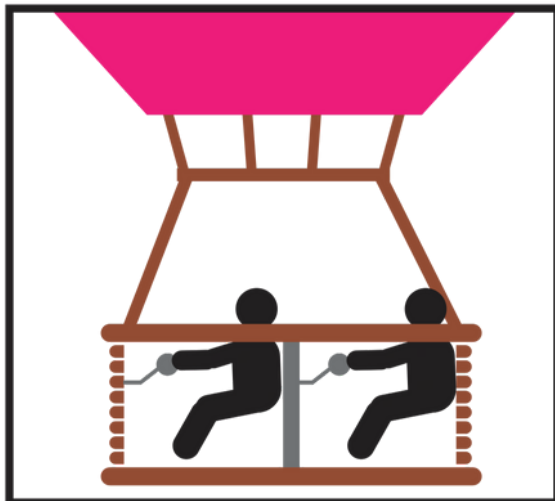

do not drop anything over the side.
do not touch any controls.

Before landing

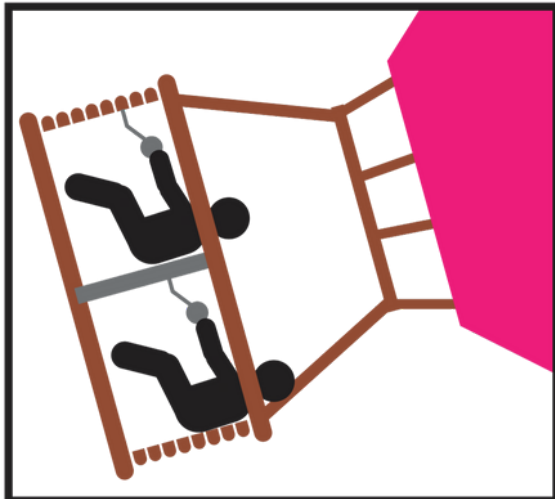

secure personal items, cameras etc.
no camera straps around neck.

Normal landing

Knees slightly bent, back pressed into padding, holding on to rope handles.

Layover landing

Remain in the landing position, holding on to rope handles.

All landings

Stay in basket until pilot tells you to exit. Use footholes, **do not jump**.
